

# REDI CLEAN

## WATER WELL TREATMENT

*Continental Technologies, Inc.*

Continental Technologies, Inc. is an environmentally health conscious corporation dealing solely with water and well rehabilitation. Our staff is well trained in the diagnosis and remediation of water wells. Our mission is to develop the best remediation technology and maintenance treatment for your individual situation while finding the most economical way possible to attain that goal. We will handle your remediation from its inception to the maintenance after disinfection. We will be glad to work with your existing well personnel to train them on proper remediation and record keeping techniques, or we can provide sub contractors. Tying trouble-shooting techniques with a proper remediation and maintenance program will keep your wells production at peak efficiencies for years to come.

<p><i>Bacteria colonize all submerged surfaces of the casings, screen, pump, column pipes, lines and gravel pack. Fines become embedded in this polymer-based colonization, further restricting the flow of water into the well. Effects include loss of volume, corrosion, increased energy cost, and in some cases... <b>loss of the well.</b></i></p>	<p><i>Common well treating techniques including hydro jetting, sonar jetting, hydrochloric acid treatments, etc. deal almost solely with the casing and screens, leaving the majority of the contamination to flourish. These types of treatments realize some temporary relief; however fall short of lasting effects.</i></p>	<p><i>Unlike conventional treatments, the <b>REDI CLEAN</b> process treats the entire well system, cleaning the screens, pumps, stand pipe, gravel pack, casing and formation face. This treatment simultaneously removes scale and biological fouling from the entire well system. <b>REDI CLEAN's</b> powerful stabilizer dispersant then holds the dissolved material in suspension so it can be pumped from the well.</i></p>

***Your #1 Treatment for Iron Bacteria!***

## Benefits of

# REDI CLEAN

## over conventional treatments

REDI CLEAN's revolutionary chemicals and treatment process attack the problem at its source, not merely treating the symptoms

Easy to apply... **environmentally friendly**

Cleans and disinfects entire well system simultaneously: screens, gravel packs, formation face, pumping equipment

Much safer to handle and transport than conventional acids

Will not harm casing or pumping equipment

Lengthens life of well system by drastically reducing or eliminating corrosion and buildup

Reduces energy consumption saving you \$\$

Better cleaning at less cost

**REDI CLEAN ACID, REDI CHLOR & REDI CLEAN ACID ACTIVATOR** are NSF certified

## VOLUME TABLE

Casing/Screen ID Inches	Volume in Gallons/Ft.
2	0.17
3	0.38
4	0.65
5	1.02
6	1.47
7	2.00
8	2.61
9	3.30
10	4.08
11	4.94
12	5.88
13	6.89
14	8.00
15	9.18
16	10.44
17	11.79
18	13.22
19	14.73
20	16.32
21	18.00
22	19.75
23	21.58
24	23.50
25	25.50
26	27.58
27	29.74
28	32.00
29	34.31
30	36.74
31	39.21
32	41.78
33	44.43
34	47.16
35	50.00
36	52.88

NOTE: The above figures may vary slightly depending on wall thickness of casing, however, these values are satisfactory for figuring volumes of fluid and quantity of Redi Clean to be used.
